

# Fashion Center Website Project Report

## Project Title

Fashion Center Website

## Project Description

The Fashion Center Website is a simple fashion shopping website developed using HTML and CSS. It includes Home, Clothes, Sign Up, and About pages with a responsive user interface.

## Objectives

Design a modern website.  
Practice HTML and CSS.  
Create a responsive layout.  
Improve teamwork.

## Technologies Used

HTML5, CSS3, Visual Studio Code, Live Server, GitHub Pages, Google Chrome.

## Development Process

Planning, designing page layouts, writing HTML and CSS, testing, fixing errors, making the website responsive, and publishing.

## Team Members and Roles

### Anas Ali Osman (C1250335)

Role: CSS Design and Styling.

Responsible for styling the website, creating layouts, colors, spacing, and responsive design.

### Sabriin Mohamed Wehliye (C1250544)

Role: HTML Development & Content.

Responsible for creating the HTML pages, organizing content, and completing the website structure.

## Challenges

Making the website responsive on different screen sizes, organizing layouts, and ensuring all pages were connected correctly.

## Solutions

Used CSS Flexbox to organize the layout. Applied CSS Media Queries to make the website responsive. Adjusted image sizes, spacing, and alignment for mobile devices. Tested the website on desktop and mobile browsers and fixed navigation and layout issues.

## Conclusion

This project improved our HTML, CSS, responsive design, and teamwork skills. We successfully developed a responsive fashion website that works well on desktop and mobile devices.
